

**Course objectives:**

- develop your communication skills in English with a scientific and non-scientific audience.
- acquire and develop your knowledge of technical vocabulary related to your field of study.
- understand and summarize scientific documents in English.

**Programme:**

<b>Session 1</b>	<b>Introduction – Back to basics</b>
<b>Session 2</b>	<b>Numbers – biostatistics + presentations</b>
<b>Session 3</b>	<b>AI &amp; You + presentations</b>
<b>Session 4</b>	<b>Zoonosis + presentations</b>
<b>Session 5</b>	<b>Genomics + presentations</b>
<b>Session 6</b>	<b>written test + presentations</b>

**Evaluation**

**Written:** Based on a video and a written source, you must either summarize the documents in English and express your opinion or summarize in French the main ideas presented in the documents.

**Oral:** presentation in groups of 2 or 3 (speaking time +/- 4mn per student) on a topic of your choice, related to your field of study.

You will be assessed on your ability to express your ideas clearly, as well as the quality of your communication and interaction with the rest of the class.

**Bonus point:** you may be awarded a bonus point according to the conditions set by your teacher.
