# Session 3: AI & you

What do you remember from last session?

Vocabulary build-up – the body

Body Part Idioms: EYES

A Sight for Sore Eyes
Someone that you're pleased to see

All Eyes Are On
Watching alertly or attentively.

Keep an eye peeled
Be observant; watch out for something

Catch Someone's Eye
Attract someone's attention

Turn a Blind Eye
Choose not to notice something

Cry Your Eyes Out
Cry hard for a very long time

All Eyes And Ears
Attentive

See Eye to Eye
To concur, agree

Black Eye
A mark of shame

Body Part Idioms: EARS

All Ears
Listening willingly, waiting for an explanation

Lend an Ear
Listen

Give Someone an Earful
Angrily express an opinion to someone

Play It by Ear
To respond to circumstances instead of having a fixed plan

I'm All Ears
You have my attention, so you should talk

The Walls Have Ears
We may be overheard; be careful what you say

That's Music to My Ears
I am very happy to hear this.

Wet Behind the Ears
Inexperienced, immature, new to something

- *Listen and take notes: 'Mitral valve Robotic Heart Valve Surgery'*

Robotic cardiac surgery

Figure 2 Robotic cardiac surgery. Credits: www.hopkinsmedicine.org

1) **Before you watch the video**

a) Would you be ready to undergo robotic surgery? Why? <u>Discuss</u> with your classmates.

b) <u>Vocabulary</u>: can you define (or translate) the following words?

leaky	
tight	
to fail	
breastbone	
to enhance	
outcomes	
staff	

c) <u>Pronunciation</u>: can you pronounce these words properly?

leaky - tight - stenosis – invasive – aortic – mitral – asymptomatic – heartbeat – routine

Now watch and take notes

From robot to AI: the future of AI in healthcare

- What do you see as the future of AI in healthcare?

- Vocabulary on worksheet

- Watch the video and take notes.

The future of AI: your turn to invent!!

Homework for next session (November)

- Watch series in English (Big Bang Theory, medical shows, etc)
- Presentations: choose your topic, make up teams, look for articles.
- Volunteers for presentations next session?
