

Role play Cancer Alley

A proposed expansion of a local industrial facility has ignited a heated debate within the community.

City council representatives: You are city council representatives who strongly supports the Development.

You believe it will bring economic prosperity to the town, create jobs, and improve the overall quality of life. You have been lobbied by the company.

Key Points for Discussion:

- Economic benefits of the power plant.
- Environmental concerns related to pollution, health, and ecosystem disruption.
- Potential mitigation measures to address environmental concerns.

Role play Cancer Alley

A proposed expansion of a local industrial facility has ignited a heated debate within the community.

Scientists: You are scientists with expertise in environmental impact assessments. Your role is to provide information and guidance during the meeting, explaining the potential environmental consequences of the expansion and offering suggestions for mitigation.

Key Points for Discussion:

- Economic benefits of the power plant.
- Environmental concerns related to pollution, health, and ecosystem disruption.
- Potential mitigation measures to address environmental concerns.

Role play Cancer Alley

A proposed expansion of a local industrial facility has ignited a heated debate within the community.

Residents: You are residents who are uncertain about whether to support or oppose the power plant. You have questions and are seeking clarification from both sides.

Key Points for Discussion:

- Economic benefits of the power plant.
- Environmental concerns related to pollution, health, and ecosystem disruption.
- Potential mitigation measures to address environmental concerns.

Role play Cancer Alley

A proposed expansion of a local industrial facility has ignited a heated debate within the community.

Company Representatives: You are representatives for the industrial company proposing the expansion. Your primary goal is to **convince the community** that the development will benefit everyone while also underplaying the scientific evidence.

Key Points for Discussion:

- Economic benefits of the power plant.
- Environmental concerns related to pollution, health, and ecosystem disruption.
- Potential mitigation measures to address environmental concerns.
