

Open Science :

An introduction

Table of contents

- **Introduction**
 - What Is Open Science?
 - Brief History
- **Open Access**
 - State of the Publishing Industry
 - Types of Open Access Models
- **Open Data**
 - What Is Data?
- **Citizen Science**
 - What Is It and How Does It Work?

What is Open Science?

Rotating Interviews about Open Science

- **In groups of three**, 5 minutes per interview before rotating until everyone had each role.
 - 1 Interviewer
 - 1 Interviewee
 - 1 Note Taker
- **Questions for the interview :**
 - Who are you? (Name, PhD Year, Research Area)
 - What is Open Science for you?
 - Have you ever had Open Science practices?
 - Have you ever felt confronted with Open Science challenges?

Modifiable

Unrestricted dissemination of research results in order to reuse them

Transparency of the research assessment process

Opening and sharing educational resources

Open Science

Reusable

Reproducibility of experiments, surveys, and other research practices

Involvement of the non-scientific general public in the research process

Open Science

**Unrestricted dissemination of
research results
in order to reuse them**

**CITIZEN
SCIENCE**

**Involvement of the non-scientific
general public in the research process**

Purchase

Check Access

Open Access: some context

OPEN
ACCESS

Rising cost of access to scientific journals... ...oligopoly of the “big four”

€ Around **125 millions euros per year** spent on subscriptions to academic publishers in France in 2022 (Couperin, 2023)

↗ In the UK, between 2010 & 2014, subscription costs to specific journals **increased by 50%** (Times Higher Education)

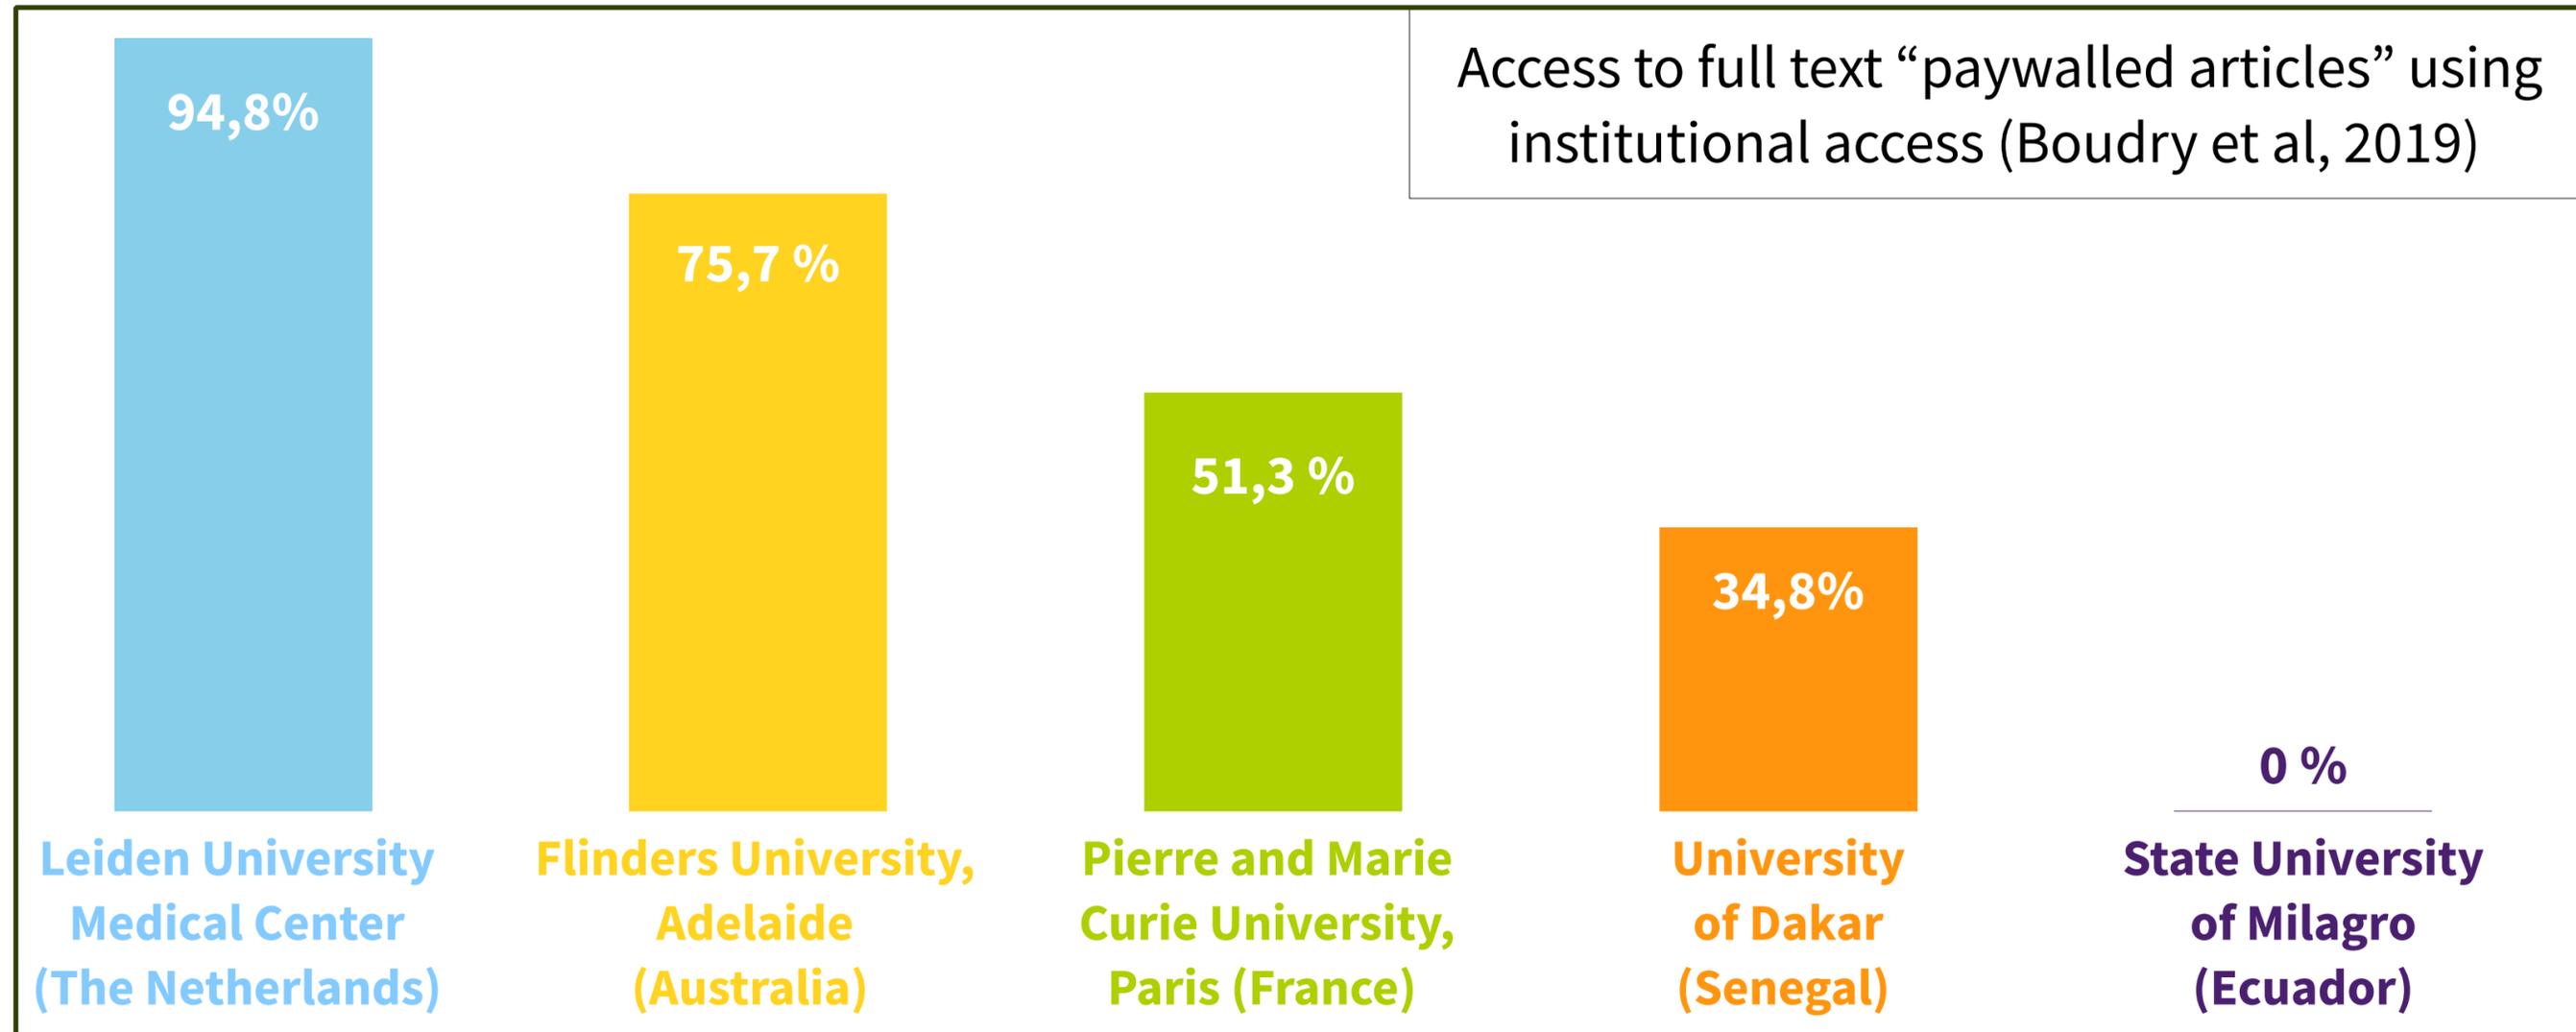

Public
Funding

↘ In 2018, the University of Liège stated that the **increased cost** in journals subscriptions equalled to the loss of **3 research positions** each year

Open Access: some context

OPEN ACCESS

Disparity in access to research publications...

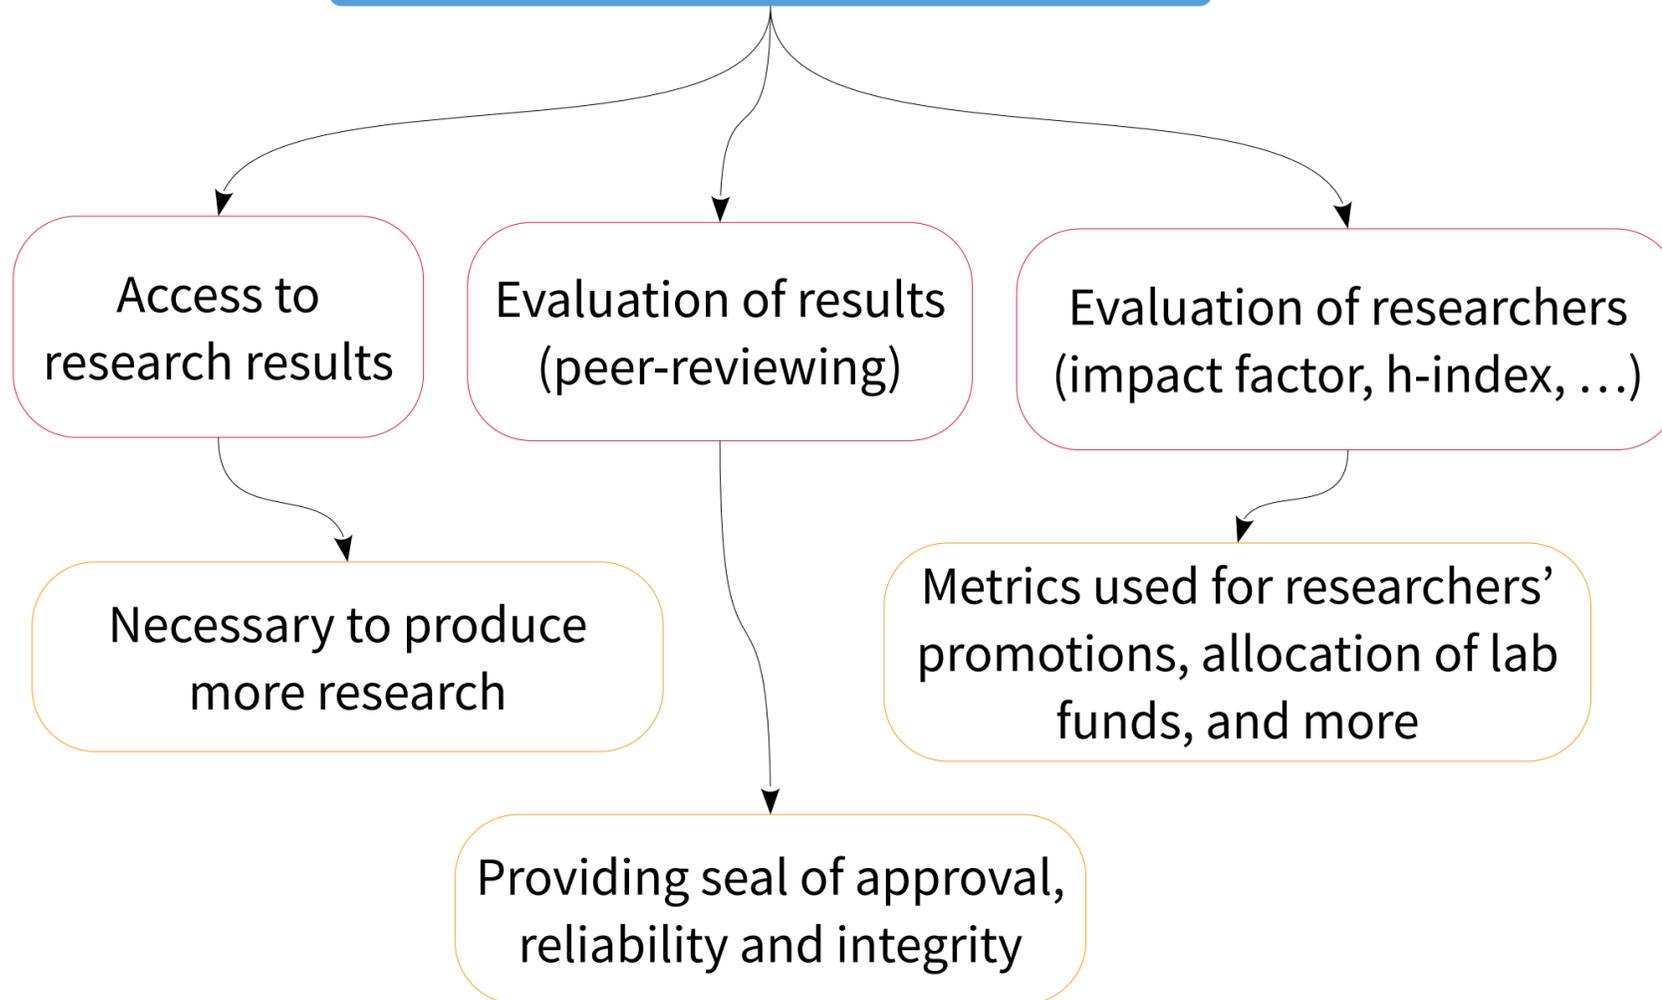

... leads to **disparity** in the production of research

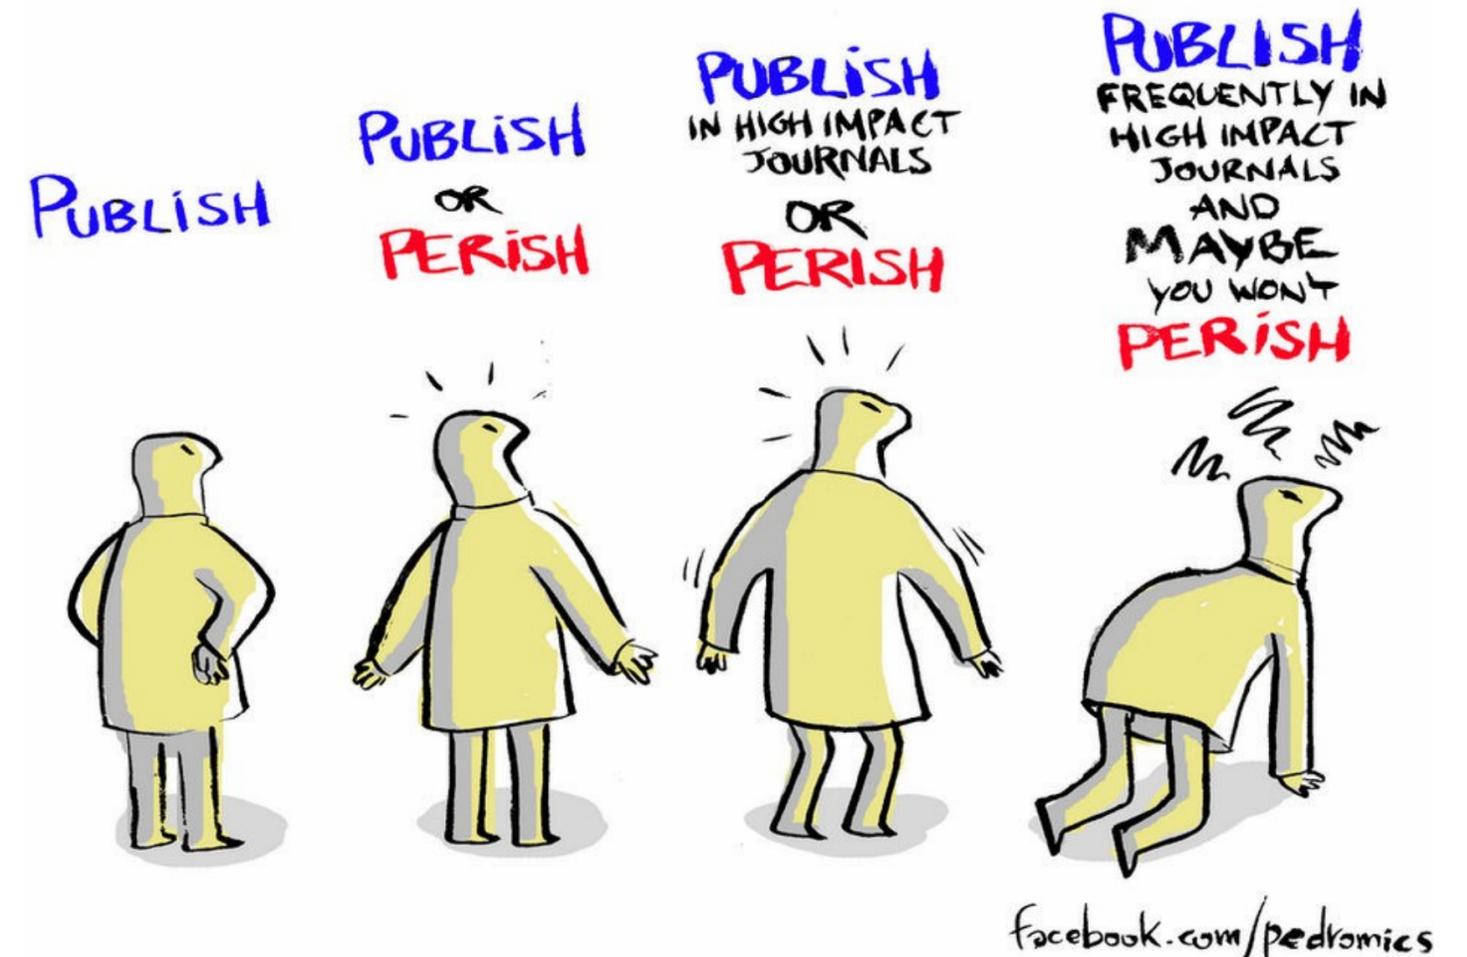

Open Access: some context

Open Access: APC or Article Processing Charges

Past and future article processing charges (APC) for French institutions

Antoine Blanchard
Diane Thierry
Maurits van der Graaf
Full report:
doi:10.52949/26

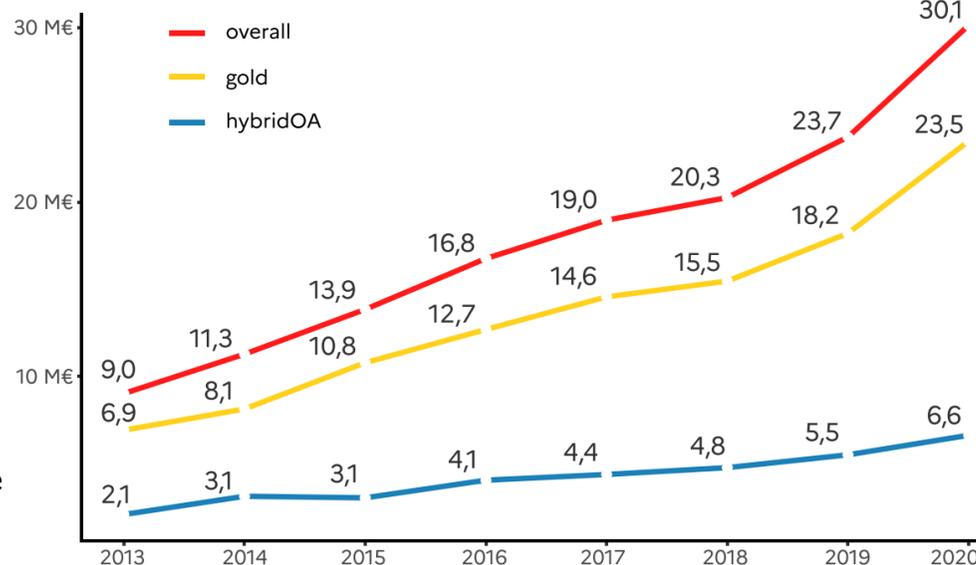

2013-2020 The highest growth rate is due to Springer Nature, Wiley and MDPI

x 3
The total cost of APC has tripled between 2013 and 2020

30 M€
is the estimated cost of APC for French institutions in 2020

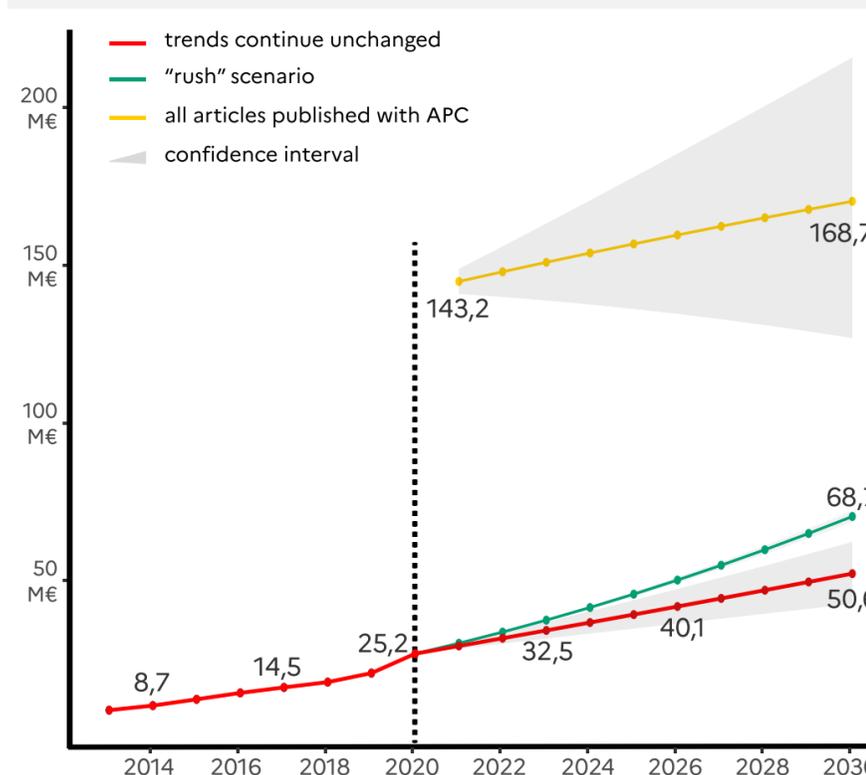

25 %
of all articles published in France have paid APC in 2020

Data: 1 032 517 articles from BSO enriched with OpenAlex, Web of science, Couperin, QOAM

The methodology is based on known and trusted data sources, with extrapolation for missing data.

2021-2030 During the decade, APC cost will increase again

50 M€ in 2030...
current trend of APC paid by French institutions

...up to 68 M€...
paid by French institutions in an alternative scenario

...at most 168 M€
paid by French institutions if all articles (except 10% diamond) had APC

Subscription expenditures: 87,5 M€ in 2020, going up to 97,5 M€ in 2030

APC: Article processing charges
BSO: Baromètre de la science ouverte
QOAM: Quality of Open Access Marker
HybridOA: open access article in subscription journal
Gold: article in fully open access journal with APC
Diamond: article in fully OA journal without APC

Open Access: pros & cons of preprints

OPEN ACCESS

Sharing preprints
in an archive ~~arXiv~~

and **more** on the DOAR!

FOR RESEARCHERS

Very short
time-to-
publish

Open Licences

Increased
visibility

Recognition of
your work

Early feedback

Can be cited,
if DOI available

Very low costs

A few journals do not accept
manuscripts previously
published as preprints

FOR RESEARCHERS AND THE PUBLIC

Free access to
work

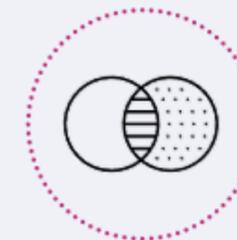

Accelerate
science
by rapidly
building upon
each other's
work

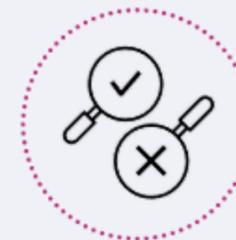

Earlier
development
of potential
collaborations

Everybody can
comment

Risk of
pseudoscience

Novelty and quality of
research not validated:
harder to distinguish
between
low- and high-quality research

Open Access: diamond model

OPEN
ACCESS

freemium

institutional funding

subscribe
to
open

Open Access: self-archiving

OPEN
ACCESS

Self-archiving an article's full-text is legal...

...thanks to the Law for a Digital Republic

> Law for a Digital Republic

(*Loi pour une République Numérique*) October 8, 2016 – article 30

> Allows all articles to be self-archived in an open archive if :

- author funded for **at least 50 %** by public funds
- in the author accepted manuscript version (**postprint**)
- after a maximum embargo of **6 months** in science, technology and medicine and **12 months** in the humanities and social sciences

Open Access: HAL & Nantes Université

OPEN
ACCESS

Accessible via :

<https://nantes-universite.hal.science/>

The screenshot shows the HAL Nantes Université website. At the top, there is a dark blue header with the HAL logo, a search bar, and a 'Se connecter' link. Below the header is a banner image of a woman using a microscope, with the Nantes Université logo overlaid. A navigation menu includes 'Accueil', 'Consulter', 'Collaborations internationales', and 'Autres archives ouvertes'. The main content area is titled 'Publications scientifiques des unités de recherche de Nantes Université' and lists various research units. On the right, there are three summary boxes: 'Contact' with an email address, 'Dépôts sans document' with a count of 60 197, and 'Dépôts avec document' with a count of 37 378. At the bottom right, an 'Open access' box shows a 44% percentage. A 'Derniers dépôts' button is located at the bottom of the list of units.

Open Access to Research Data

What is data?

Open Data: What is data?

OPEN
DATA

Research Data

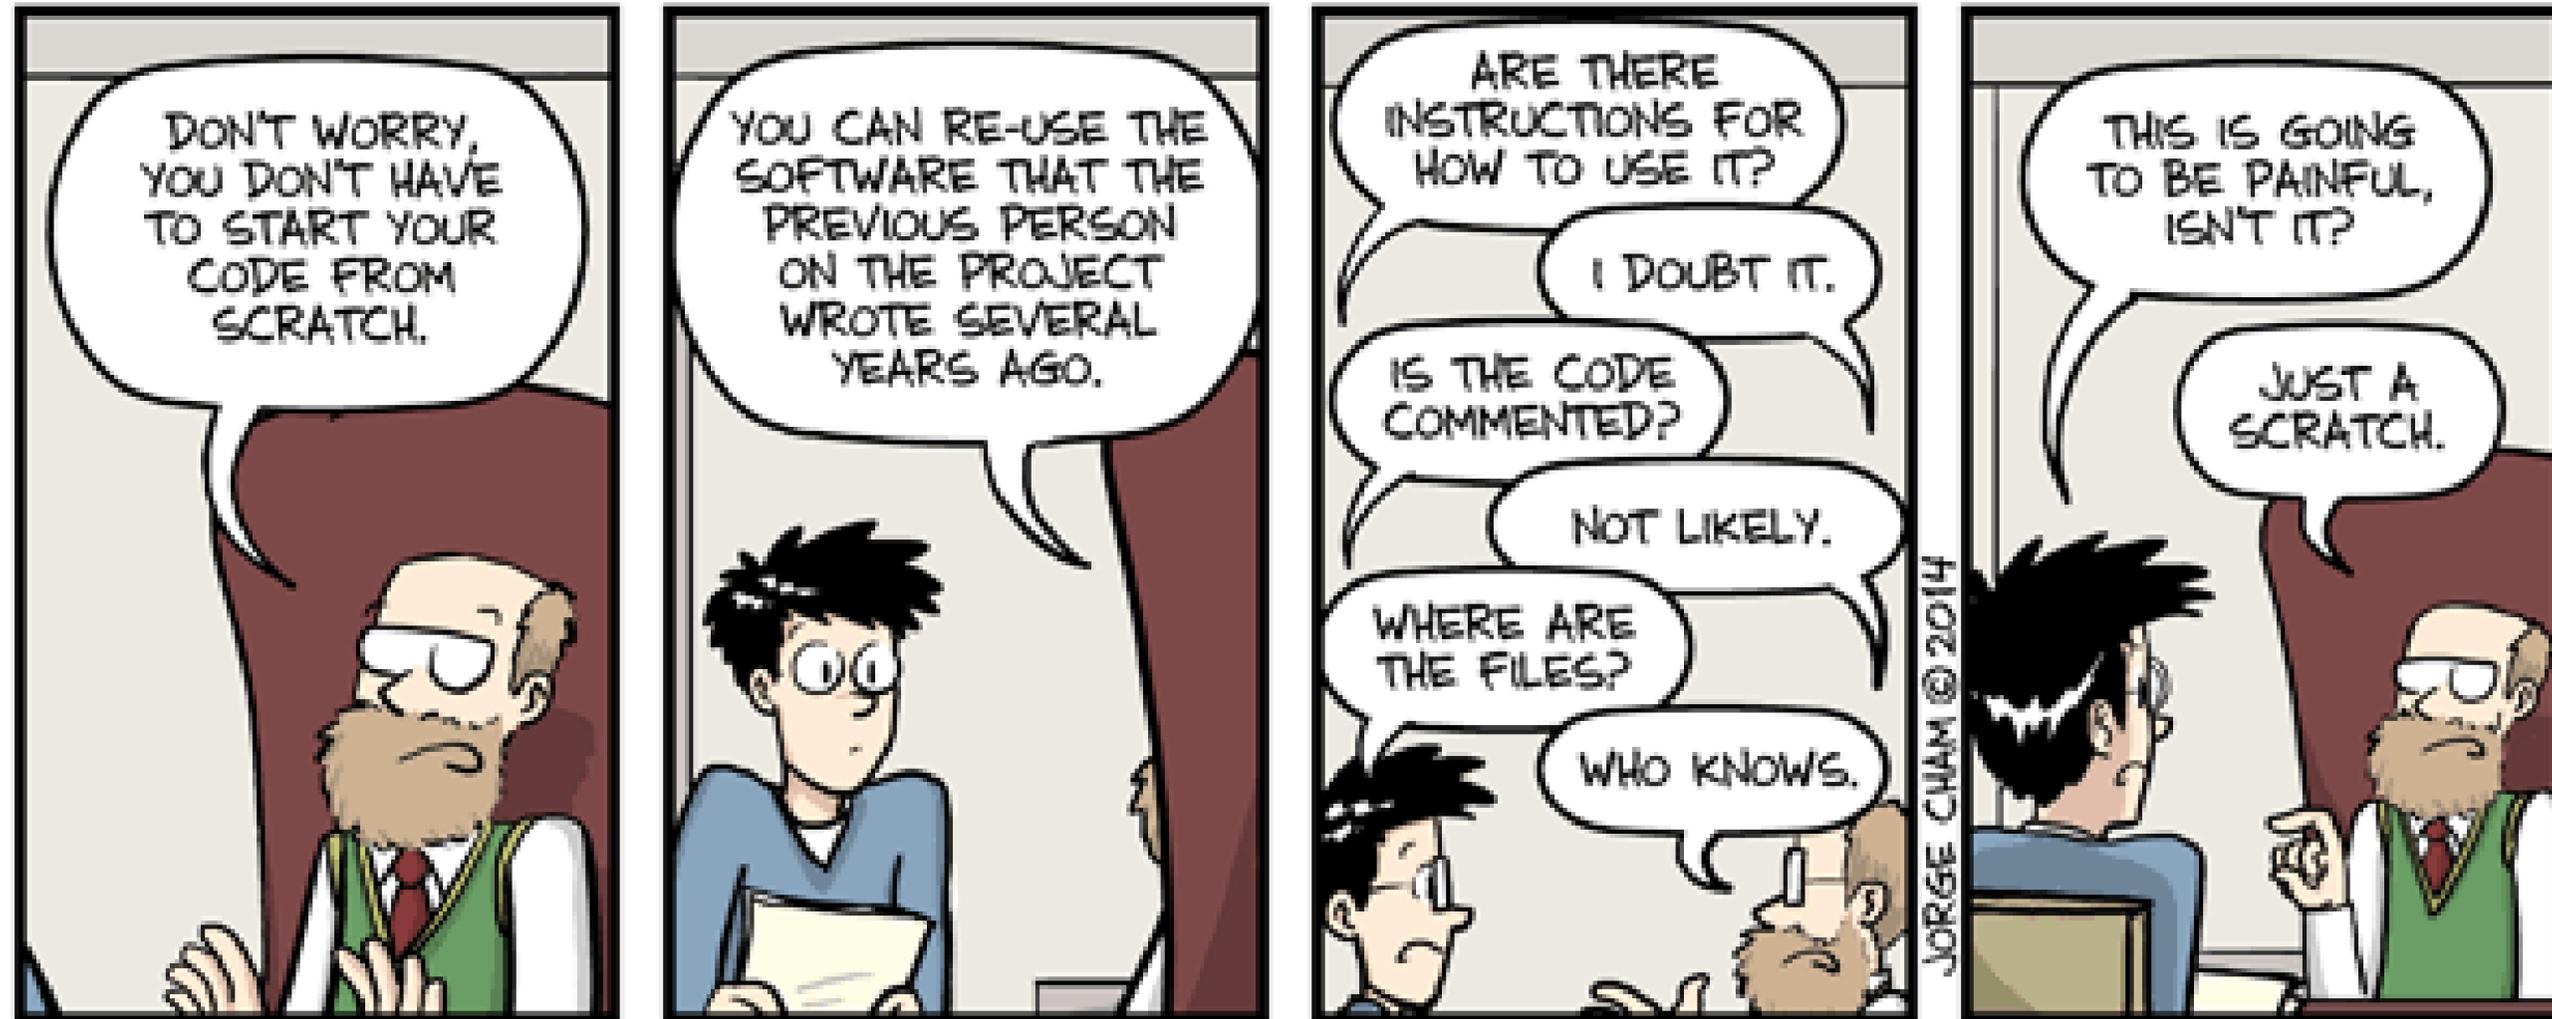

“factual records (numerical scores, textual records, images and sounds) used as primary sources for scientific research, and that are commonly accepted in the scientific community as necessary to validate research findings”

Research data can be sound recordings, video images, satellite images, images taken with a microscope, a corpus of texts, transcripts, a table of results from a survey or test, temperature readings from a time series or any other measurements in the field, the content of a database...

The screenshot shows the website for the Nantes University library's 'Science ouverte' (Open Science) section. The header includes the Nantes University logo and the text 'Bibliothèque universitaire' and 'BIBLIOTHÈQUE UNIVERSITAIRE > SCIENCE OUVERTE'. The main content area is titled 'Diffuser votre recherche avec la Science ouverte' and contains a paragraph explaining the university's commitment to open science. Below this, there are three main actions: 'Déposer ses publications dans HAL', 'Publier en accès ouvert (open access)', and 'Gérer et partager ses données de la recherche'. A sidebar on the left lists various navigation options, with 'Science ouverte et services aux chercheurs' highlighted. A photograph of researchers in a lab is also visible.

Publier : quelques repères

Les données de la recherche

Diffuser votre recherche avec la Science ouverte

La science ouverte vise à assurer une large diffusion des publications et des données de la recherche, auprès des pairs et du grand public. Engagée dans une démarche d'ouverture, Nantes Université a fait de la science ouverte un de ses axes de développement, s'appuyant sur les services proposés par la Bibliothèque universitaire pour accompagner l'ensemble de la communauté scientifique.
